

### The hopes that all souls have in you ancestors.

Today, the *Great-Great-Grandfather* is meeting all of His creation. All of you know how large the creation is. All of you are the original *foundation* of this creation; you are the trunk of the tree of this creation. You know very well all the secrets of how this creation grows from all of you, do you not? When you see or come into contact with any soul, do you remain aware that you are the ancestors of all souls and that you are the main support, the *foundation* of the branches and twigs of the tree? Does this awareness constantly remain *emerged*? When you maintain this elevated awareness, you will easily become an embodiment of power. When the trunk, the main *foundation*, is weak, the whole tree becomes weak. When the trunk is powerful, the tree is also powerful. As well as being related to the seed, every leaf is also connected with the trunk. It is only through the trunk that the seed's power can reach the branches and twigs. So, today, which power does the whole of your creation need to receive through you ancestors who are the main support? With which hopes are all souls remembering you ancestor souls? What pure desire do they have of you *master* bestowers and bestowers of blessings? Do you know the pure thoughts and desires of all souls, that is, of your unlimited creation?

Today, only one sound is being heard from all souls; the same sound emerges from everyone. They want to live in happiness and comfort, if only for just a few moments. They are restless; even though they have the wealth and the facilities for happiness and comfort, the rest of happiness or comfort is not visible in their eyes. Nowadays, because the *majority* are thirsty for true happiness or joy and peace, they are searching for the path to that. Because they are dissatisfied with the different temporary paths that they have taken, they are gradually returning from all those paths, saying, "This is not the one! This is not the one!" They are now coming to the experience of "neti, neti" (It is neither this nor that). They have begun to realize that the true path must be elsewhere. At such a time, the duty of you ancestors is to become a flame of light and show the path to those souls. Become immortal lights and bring those souls out of the darkness to the right destination. Do you have such thoughts? Do you ancestor souls remain aware that what you do in front of the whole of creation reaches the whole creation? The attitude of you ancestors will transform the atmosphere of the world. The vision of you ancestors will remind the whole of creation of *brotherhood*. The awareness that you ancestors have of the Father will remind the whole of creation that their Father has come. The elevated deeds of you ancestors will awaken the pure desire in the creation to perform elevated actions, that is, to build their character.

Everyone is searching for you ancestors. Now become such embodiments of unlimited awareness that all of your limited things will automatically come to an end. When it comes to the inverted tree, the trunk is seen to be at the top with the Seed. You are the trunk who, along with the Trimurti, has a *direct* and close relationship with the Seed and the two main leaves. Therefore, this *stage* is so elevated! What would you experience limited matters to be when you remain stable in this elevated *stage*? You would experience them to be careless things of childhood. Come into the stage of unlimited maturity and you will become a constant embodiment of all experiences. Remain constantly aware of your *occupation* as an unlimited ancestor. You remain constantly aware of how much of the task still remains, but how is this whole task to be accomplished easily? Your creation, the *scientists*, are merging the expansion into its essence. They are inventing extremely subtle and powerful things that will require the least expenditure of time, wealth and armaments. Earlier, there used to be such big armies, so many armaments and so much time involved in a task of destruction. However, they have now condensed the expansion into its essence, have they not? In the same way, you must become *master* creators and use only in name for the task of establishment the physical facilities you have along with the subtle (power). Otherwise, your subtle power will be hidden amidst the expansion of your physical facilities. The expansion of your physical facilities will hide a *percentage* of your subtle power, just as the seed is hidden by the growth of the tree. The uniqueness (alokikta) of you ancestor souls is your subtle power. From this, let others experience a special power being created through the ancestors. The creation wants something new from you souls. Everyone has the power of facilities and the power of words, but what power do they lack? They lack the power of elevated thoughts, the power of a pure attitude, the vision of love and co-operation. No one has any of those. Therefore, o ancestor souls, ignite in your creation the lamps of hope for this attainment and bring them to the right destination. Do you understand what you have to do? What would you achieve if you do the same

things as other people do? You are the people who belong to God! You are unique! At present, you drop *bombs* of words. However, they are only *baby bombs*. Now, drop *bombs* of the experience of attainment with which their lives would be instantly transformed. The arrows have only struck their heads. The arrows have not yet struck their hearts.

You will have to be given a *plan* of what to do next. At present, the sound that emerges from their mouths is that the work you do is very good. However, let the sound emerge from their hearts that this is the only path. There are many who make a bargain with words, but only a handful out of multimillions who make a bargain with their hearts. All of you are the children of the Conqueror of Hearts. You are those who make a bargain with the heart. So what will you do now? Spin such a powerful discus of service that all souls recognise their ancestors and claim a right to their attainment. Instead of just enabling them to hear something good, let them experience receiving something. Do you understand? Instead of, "They say good things", let it be, "They make you very good." With the method of using less expense, less energy and less time, become embodiments of success.

This is the Punjab *zone*, is it not? What will Punjab be made into? Show some newness. To give an experience means to create heirs. Those who listen to this very well and simply say that this is good become subjects. Their *quality* souls are now needed. Subjects will automatically follow after an heir. What will Punjab do? If the *quantity* is not increasing, *quality* souls can emerge, can they not? What will you do? There are now very few heir *quality* souls anywhere. Therefore, Punjab, become *number one* in this. Some of you become *number one* in *quantity* and some become number one in *quality*. Do you understand? What will those from Punjab do? There would be one soul of *quality* and many of *quantity* because one *quality* soul would automatically bring a large *quantity* of others. Your task can be accomplished through that one's name. This is easy, is it not? Achcha.

Today, it is the *turn* of those from Punjab and Madhuban. Those from Punjab will bring everyone to Madhuban and make them *surrender*. The rivers will emerge from Punjab. However, where will they merge? Madhuban is the shore of the Ocean. Therefore, here it is the meeting of Punjab and Madhuban. It is the special *turn* of those of you from Punjab. Therefore, Baba is speaking to you who have come from Punjab. However, everyone is in fact included in this. All are included in Madhuban anyway. Where does everyone have to merge? In Madhuban. Achcha.

To all the ancestor souls everywhere, to those who fulfil all the hopes of everyone for all time, to those who give even one drop of the experience of attainment to souls who lack attainment, to those who bring everyone from the many other paths onto the one path, to the main supports of all souls, to those who enable everyone to claim their right from the one Father, to such elevated ancestor souls, BapDada's love, remembrance and namaste.

You have heard a lot and the speciality now is to become an embodiment of that and to make others the same. To the extent that you are embodiment of all attainments, accordingly, you will be able to make everyone else an embodiment of attainment. Nowadays, all souls want to attain something and not just to listen to something. Only when they have attained everything will they sing with great happiness the song, "I have attained whatever I wanted to attain". You all also sing this song of happiness, "I have attained everything." In the same way, many souls will sing this song of happiness. At present, this is what souls want. It is the duty of you elevated souls to fulfil the need of those souls. In this task, you embodiments of experience continue to give others this experience. This is what they want, is it not? So, are you a constantly satisfied soul who fulfils their desire, that is, who makes other souls satisfied? Constantly full of all treasures. Those who are full will be satisfied; and you would surely give to others what you yourself have. So, constantly maintain the intoxication and happiness of being an embodiment of all attainments. This is the speciality of the confluence-aged life. To have attained the Father means to have attained the instant, visible fruit of the confluence age. The instant visible fruit is all attainments. With this stage, you will achieve total success.

**BapDada meeting Madhuban resident brothers and sisters:**

Madhuban residents are so fortunate that everyone becomes happy on seeing you. Do you know the extent of your fortune? You are so fortunate that you are always on the shores of the Ocean. Even physically, you constantly have the company of the Father and elevated souls, and so it has become such great fortune! So, do you constantly sing praise of your fortune? Simply continue to sing this praise and swing in the swings of happiness. To be Madhuban residents means to be those who are always as sweet as honey. So, you are those whose mouths are always sweet and you also sweeten the mouth of everyone else. You are the *holy* swans who live on the shores of the Ocean. What do swans do? They always pick up pearls. They don't look at the stones, they look at the jewels. So, you are those who pick up all jewels, are you not? You are the great souls who live at the greatest pilgrimage place. So, this is a *group* of great souls, is it not? A great soul means one who constantly looks at great things. So, what is the great thing? (Soul.) So, upon what would the vision of a great soul fall? On something that is great. So, someone who always looks at what is great, who speaks great words and who performs great deeds is called a great soul. So, all of you Pandavas are great souls. In whom does BapDada have the greatest hopes? In the Madhuban residents. Those of Madhuban know how to ignite the lamps of hope, do they not? So, there is constant Diwali in Madhuban, is there not? Since the lamps of pure hopes are always ignited, it means it is Deepwali every day. So, there can never be darkness in Madhuban. Those in Madhuban are *master* teachers. Whether you teach or not, your every action definitely continues to give teachings to every soul. Whether you do something ordinary or something elevated, others will learn this from you before they leave here. You don't give teachings, but to become a resident of Madhuban means to become a *master* teacher. So, always remember: I am a *master* teacher. Your every action and every word is what teaches. You don't need to sit on a gaddi especially and teach others, you are teachers whilst walking and moving around. Just as people have mobile *libraries* nowadays, so all of you are mobile *master* teachers. Your *school* is good, is it not? So, constantly see *students* in front of you. You are never alone; *students* are always in front of you. You are constantly studying and making others study. A worthy teacher would never be careless in front of his *students*; he would always pay *attention*. Whether you are sleeping or awake, when you are walking or eating, at every moment always think that you are sitting in a great *college* and the *students* are watching you. So, you are *wonderful* teachers, are you not?

How can all of you be praised? Whatever praise there is, it is all applicable to the residents of Madhuban. Constantly move along whilst considering yourselves to be so great. You have to live up to the amount of praise the Father gives you. So, you are clever at living up to this praise, are you not? The map of Madhuban goes to the whole world. What does everyone's intellect constantly remember? "What is happening in Madhuban." So, the awareness of you is fixed in everyone's intellect. Each of you Madhuban residents has to become an orb of *light* and *might*. Then, everyone will automatically be attracted to come into the orb of *light* and *might*. At present, because the Father's task is still continuing, the children who belong to the Father experience everything to be easy and will continue to do so. Your task is still incognito. You now have to create the atmosphere with your form of power. This will happen according to the *drama*. It is going to increase and continue in this way. Therefore, the One who is making everyone do everything is making it happen, but you must now *follow* the *Father* in the same way. Now, every soul has to become an embodiment of power. Whoever you come into contact with will experience spirituality. That part will now begin. You were told that, at the moment, they all say that this is good, but they are not being inspired to become good themselves. There is only one method for that collectively - become a form of intense fire. Each of you has to become a living *lighthouse*. You are servers, you are loving and you have one faith and one Support: all of this is fine. However, if the *stage* of the *master* almighty authorities were to come on to the *stage*, everyone would then come and circle around you like moths. At the moment, there is the attraction of just the Father, the Flame. However, what would happen if there were the attraction of all the flames? You are the flames, but you have not yet come onto the *stage*. Come onto the *stage* and see how all the residents of Abu come running after you. You won't need to go to them; they will come themselves and ask you: Yes, my lord, is there any service I can do for you?

At present, you have become especially beloved children and that is fine. Everything is fine when it comes to fulfilling the responsibility of the relationship and affection of Father and child, but now become *master* teachers, *master* satgurus and then come onto the *stage*. These two *parts* now still remain. Do you

understand? Achcha. BapDada always sees the residents of Madhuban as special souls. Residents of Madhuban are constantly lamps of the Father's hopes. All of you are always content, are you not? To remain content and to make others content is the constant *slogan* of all of you. What *slogan* is constantly written on your *board*? "Stay content and make others content." Those who claim this *certificate* will claim the *certificate* of the fortune of the kingdom in the future. So, all of you Madhuban residents have claimed this *certificate*, have you not? Constantly bring this *slogan* into your awareness at amrit vela. Just as you have a *slogan* written on a *board*, so you must also constantly have this *slogan* on the *board* of your forehead. Then, everyone will become an image of contentment. Achcha.

**Blessing:** May you become a conqueror of obstacles who with your power of transformation becomes worthy of receiving thanks from everyone.

If anyone insults you, then transform that insult into mercy in a *second*. If others come to test you with their nature and sanskars, then, with the awareness of One, adopt an elevated nature and sanskars of mercy for such souls. If anyone comes in front of you with body conscious vision, then transform his vision into soul-conscious vision. If you learn this method to bring about such transformation, you will become a conqueror of obstacles. All souls who come into contact with you will then thank you.

**Slogan:** Become an embodiment of experience and the sparkle of being fortunate will then be visible on your face.

**\*\*\* OM SHANTI \*\*\***
