

*Bhog Message (OSB, Pandav Bhawan) – Thurs, 9 July 2020*

By BK Shashiben

On the day of the Satguru, as I reached the Subtle Region carrying everyone's remembrances, I saw Baba standing ahead. Baba spread both his arms out, and said, "Come Children, dearly loved Children, Children who are seated on the Heart-throne!" Immediately, a number of sisters and brothers got emerged in front of Baba. Today, Baba appeared to be in the form of the Father, as well as the Teacher; there was so much love being experienced, and along with that, the official (formal) form of the Teacher who instructs.

Baba said, "Today, Baba was looking at the spiritual endeavour of the children, but also at how the children were checking themselves."

Baba emerged a paper in front of each child, as though the children had to take an exam. Baba explained, "It is not the Father who is testing the children, but time and circumstances are automatically teaching the children, taking their exam, and the children are becoming experienced in this. As the Teacher, Baba wants to see how the children check themselves in three aspects: one's own spiritual efforts, the extent of self-transformation, and how far the children are making themselves perfect."

The scene was that of a Teacher standing before the children, who were seated for their exam. Gradually, I started to see beautiful and colourful designs appearing on each one's paper. However, on most papers there wasn't the slightest bit of empty space finally. The children were very pleased, showing Baba the kinds of efforts they were making, the type of checking they did, and the type of transformation that they had brought about. Baba smiled on seeing all of this.

There were just a few papers that had a bit of empty space on them; Shiv Baba, the Point, was visible within that space, as well as a sparkling star. As Baba took the paper in hand, beautiful rays of light emanated from the star and took the form of the Perfect form, and that of the future World Emperor.

Baba said, "Look at what the children are doing; they are making efforts but on an external level. They make beautiful plans, but at times they start to praise themselves saying, 'I have done this and that', and these were the designs that Baba saw. However, Baba has already shared that the checking that is required, the spiritual efforts that are needed or transformation that is required at the last period is to become the embodiment of the Point (*Bindi*). The entire transformation lies within the Point; it holds the stage of Perfection. It is only through the Father, the Point, our Companion, that we can attain anything for the future.

"The children are making good efforts, they are working hard, they have a lot of love, they are filling themselves up, they are preparing to transfer everything (to the new world), and so Baba is pleased to witness the children's efforts. However from time to time, Baba also has feelings of mercy for the children as they are laboring in their efforts. However Baba wants them to change that aspect of laboring; all you have to do is stabilise yourself in the attainments you've received from Baba. 'I am a Point, my Father is a Point, I am a sparking Star full of all powers...' When the children stabilize themselves in this stage, they automatically experience perfection, transformation, and are able to visualize how you will live and play closely with the World Emperor in the future kingdom, on the basis of your status."

Baba was in His official form as the Teacher, but He was sharing a lot of love while teaching the children. Baba smiled and said, "The Teacher is happy today since the children are lost in the love of making spiritual efforts, but they now have to go in the subtleties of effort-making; presently, there is more pull towards extroversion, but now go into the subtle aspects. The more the children pay attention, they will then be liberated from the influence of external matters. Even now, the children think a lot about external situations, and come under the influence and effect of the same. But the more you stabilise yourself in your original form and make efforts, then the fear-invoking external situations will be transformed into scenes of success, and you will experience yourselves to be Victorious Jewels."

I offered Bhog to Baba. Baba shared loving remembrances for everyone, again mentioning that Baba is aware of the spiritual efforts the children are engaged in.
