

Touching and Catching Powers is the Sweetest Fruit of the Power of Silence.

By Yogi BK Khem Jokhoo. Trinidad. March 2019

According to the present time, as peacelessness and upheavals in the world increases, catastrophic situations and in particular the elements are occurring suddenly causing unexpected and untimely deaths. **Therefore, it is important that the mind and intellect remains pristinely clean and clear as it is essential for you to catch the Father's signals, directions and shrimat so that nothing else is mixed with His touching.** If the line is not clear, the dictates of the mind becomes mixed with Godly signals and directions. Then, because everything is mixed at the moment of need, the soul suffers loss. So the clearer the mind and intellect, the more you will be able to catch, decipher and discern the divine directions. The touching will become very clean and clear such that you will know which particular soul to serve or what direction to follow.

Accurate Touching and Catching Powers

Accurate Touching and Catching Powers are dependent on the power of realisation, remembrance of the Supreme Soul as well as purity of the soul. All three categories should become natural to the soul over a long period of time. The power of realisation induces transformation of the soul through awareness of soul consciousness, remembrance and intense yoga as well as accumulation from elevated actions. These three attainments absolve the accumulated sins of the past and increase the purity of the soul. Purity does not only mean celibacy, it includes a firm vow for a pure diet, purity of thoughts of the mind, words and actions as well as actions while coming into relationships and connections for the entire birth. All these conditions are also a prerequisite to acquire the highest stage of the "Power of Silence" as well as the accuracy of discernment of Touching and Catching Powers.

The Power of Silence

When your power of silence becomes natural and original over a long period of time, you will be able to decipher and discern accurately all signals and directions no matter what the situation may become or where you are in the world. Baba has ordered the constant practice of the one-second meditation drills required to achieve the highest stage and benefits of the powers of silence. Baba has encouraged the practice of concentrating the mind and intellect with

Controlling Power and then invited you to come to the souls world to have remembrance of the Supreme Father as well as the inheritance. Baba said if you make this practice natural over a long period of time, not only at Amrit Vela but throughout the day, the soul will emerge its original deity sanskars and become equal to the Father's stage.

Silence of First Renunciation (Mixed Touching & Catching Powers)

In this first stage of silence, you increase the process of renunciation at a very fast speed, firstly from body-consciousness to soul-consciousness. Secondly, renunciation to become master of the five senses as well as the five elements or matter. Renunciation becomes more intense where you now not only conquer the five vices or maya but cremate their roots to prevent progeny or traces of impurity. This is sometimes called the double light stage where you can sit in one place and practice the "Dristi of Sakaash" to bring souls closer to Baba. Celibacy as well as Purity of pure food and drinks, purity in thoughts, words, actions as well as relationships and connections becomes very firm. Purity is the basis of yogic life; worthy of worship status, elevated attainments, the power of silence as well as elevated actions and these can be accumulated in the spiritual bank that is open only in the confluence age, no other time or births.

Bodiless Silence (Mediocre Touching & Catching Powers)

In this higher stage of the power of silence, you begin to realise that the eternal nature and attitude of the soul is peace and silence. In this stage you go beyond name, time, space and age and all forms of limitations. You will then go beyond the physical and subtle and experience being "a point of light" as well as giving "drops of cooperation". You are able to transform the atmosphere with the pure vibrations of your attitude and to give souls an experience. An experience causes permanent transformation that is never forgotten.

Incorporeal Silence (Reliable Touching & Catching Powers)

In this advanced stage of the power of silence, you experience the stage of liberation in the soul's world where knowledge, virtues and the powers are merged and the only awareness is that the Almighty Authority is my Companion(mera dost). You then become fearless. Your true nature of peace and silence emerges with a spiritual attitude of good wishes and pure feelings that makes the atmosphere powerful. You do not have the awareness that you are in the soul's world as this

is the speciality of the confluence age. This is the nirakar stage or the incorporeal stage. This is different to the bodiless stage where you are separated from the body while you are still in the body.

Seed Stage Silence (Clear & Clean-Decipher & Discern Touching & Catching Powers)

This is the purest and highest stage of the power of silence. Your nature is now golden-aged and natural and it is the same as that of the Spiritual Father. The first spiritual activity of the day is “Amrit Vela” where your mind and intellect is merged in divine love and remembrance with Shiv Baba. You experience all the relationships, the first being the Shiv-mantra where the soul experiences the manmannabhav stage in its highest and purest form inherent in the seed stage. Here, Baba uses the Shiv mantra to see the complete and perfect form of souls. You are then merged in love and Baba says I am your Spiritual Father and you are my spiritual child and the children say I am your child and you are my Father (Mera Baba). Inherent in this “Seed stage” is the magic mantra of “Mera Baba” where Baba have said that if there are any obstacles or difficulties in your path, simply remember “my Baba” and maya will move aside, salute and bow to your wishes. This “mera Baba” gift from Baba can transform sorrow to happiness, peacelessness to peaceful and from powerless to powerful. Anything bad can be transformed to something good. It is to be noted that this “mere Baba” mantra is not the same as the “chhu mantra” in the path of devotion where this “chhu mantra” is repeated incessantly to remove illnesses or can transform matter into imitation jewellery, makes things appear and disappear, a tantric occult power called magic.

When ShivBaba sees everyone in their complete and perfect form according to their capacity, He adopts His merciful form and becomes the Innocent Lord. As the Merciful and Innocent Father, he knows all your weaknesses and yet he becomes “merciful” (Rahem) and “Innocent” (Bholanath) so that you don’t accumulate further sin in that sin (AM 02.11.87). The “Seed stage” is also used to transform the body consciousness of “I” and “Mine”. When “I” is used by the children, it is used in the remembrance that “I am a peaceful soul (Om Shanti) and ShivBaba is my Father (Mera Baba). This remembrance transforms the “I” and “My” to the awareness of soulconsciousnes and reminds you who is the One giving you the directions and inspiration. It is a gentle reminder as to whom has bestowed these specialities, duties and gifts that you have now attained. You have to remain egoless rather than be too clever. The specialities, duties and gifts

are given to you by the Father, Karavanhar(AM 03.03.2019). The Father wants you to transform your old iron-aged rawanic nature that you secretly guard and transform it to your worthy of worship Golden-aged natural nature and original sanskars similar to the deities. It is only then you can become equal to the Father and return with Him as companions without having to pass through the “Land of Dharamraj” to settle remaining karmas through punishment as well as repentance for thoughts not transformed into actions.

The Power and Attainments of the Seed Stage.

In this seed stage and you have now attained the realisation of the awareness of soul-consciousness as well as the relationship of Father and child(Malik aur balak). Here, when your attitude and vision(vritti and drishti) changes, then the world(shristi) changes. So for world transformation, there must first be self-transformation through the power of realisation. This is the main reason ShivBaba’s ordinance is to make your nature and attitude natural with the practice of the power of silence, not only at Amrit Vela but during the day as well, such that your natural nature becomes permanent over a long period of time.

This is because at Amrit Vela, Shiv Baba is giving you the Drishti of Sakaash to emerge your deity sankaras which is also known as your original swadharma sanskaras that contains the seven attainments of spiritual power, purity, happiness, godly love, peace, knowledge and bliss.

If you are able to have this power of realisation, then you will constantly experience the karmateet stage where you have transcended karma and are here only to do spiritual service and yet able to perform elevated karmateet actions. This is the golden-aged stage where you are a world benefactor. You experience complete purity, peace and happiness. This is the experience of the power of silence where you have achieved all the attainments you wanted to attain.

Catching and Touching Powers-the Sweetest Fruit

When the Shiv-mantra is working in harmony with the Om Shanti and the Magic Mantra of Mera Baba, it merges the “Double Om Shanti Stage” into the most powerful “Seed stage”. In this stage, the soul becomes most intuitive making the mind and intellect clean and clear because it can decipher and discern any impending obstacles, difficulties or disasters with solutions even before the problems are known or become visible. This means the imperishable soul can now protect the body from unexpected or untimely demise where the soul has the option to exit that

place or to leave that body on its own terms and volition. Before any disaster, the news will reach those with catching and touching powers. Only when you have reached a safe place will disaster begin. Science is going into its extreme, but the power of silence over science will bring about transformation. Those who maintain one step of courage is bound to receive one thousand steps of help from the Father. **This is the main reason that ShivBaba's ordinance to the children is to practice, accumulate and become the masters of the "Power of Silence" making the "Catching and Touching Powers" its sweetest fruit.**

Maharathis Power to Discern

Baba says that a good guard should be able to discern and decipher the needs of anyone from a distance. Only maharathis with the lighthouse and mighthouse stage possess this specialty. Therefore, the power to discern is a prerequisite for the angelic karmateet stage. Shiv Baba explains this in AM 6.12.75 quote **"To discern someone through that one's sanskars, words and activity is common, but to be able to discern someone through the vibrations of his thoughts is the real power of discernment. This is the discrimination power of the maharathis. You will be able to increase this power when you are able to discern the presence of others even though they may not be in front of you.....this is known as the success of the powers.....This stage will also come, but only for a few and only for a short time. This is why Baba's says: Those who stay till the end will be able to see and experience these scenes."**
