

Dadi Janki - 27.4.08 – GCH, London

You become whatever is in your awareness

Should we praise the Confluence Age, Baba, the self, the family or Bharat? The Confluence Age is the age for singing praise and becoming worthy of praise. We praise the Father on the path of bhakti because we know He made us like Himself. If He hadn't taken us from hell into heaven – who would remember and praise Him?

Baba is the Ocean of love and bliss and we enjoy being in the waves of love and peace. When you see the force of the ocean, it is like Baba conducting the murli at fast speed. Why do we say we are the children of the Ocean not of the Sun? Baba is the Sun of knowledge but it is said 'the children of the Ocean of Knowledge'. We pull rays from the Sun of knowledge. There is light in our lives through cleanliness and, by pulling the rays of the sun, we become clouds and then shower knowledge. When we used to go to Madhuban Baba would always ask, 'Children, have you come to be refreshed?' As a bit of dirt gathers on the soul, we go to Baba to recharge our batteries. Nowadays everyone wants everything to be 'automatic' and Baba needs children who are 'automatic'. Everything within the self needs to be so refined that we work automatically, with the powers working for us in a natural way, under our orders.

Baba has such love for the children that He wishes us to pass with honour. He says 'I am ever worthy of worship' but my worship is in the form of the Shivalingum whereas your worship is twofold – as saligrams and as deities. If you keep in your awareness 'I want to be a worthy of worship soul' then you will become it. Whatever is in our awareness we will become, and we will be remembered on the rosary.

We have taken 84 births. We found Baba and let go of everything else, because in finding Baba we found everything. We have so much happiness, and in that happiness there is automatically renunciation. Baba is the Magician, the clever Businessman, and the Jeweller. Or is it the other way round, that we see the jewels then we strike a bargain with Him? We receive so many jewels. We like the sweetness of knowledge and when we churn we realize that each point is a special jewel. Baba says 'play with the jewels of knowledge'. Who looks at themselves as a child of God? He has made me His and I have made Him mine.

See to what extent you are in solitude; don't go into the expansion of external things. Go into the depth of One. When you are in the state of solitude you become more focused and can conserve energy. When experiencing internal solitude it does not take time to do what you need to do.

One wonder of Baba was how quickly He did business. In one year there were centres throughout Bombay. This should happen in foreign lands too. Make people open their eyes in wonder. Show others how the home becomes heaven with those in the family living a pure and yogi life. 'Manmanabhav' and 'madhyajibhav' – direct your mind to the One above and remember the one in the middle, the aim and objective, Vishnu.

Dadi Gulzar (on the phone from Shantivan)

Be determined and forge the link

Om shanti to everyone. London is in BapDada's vision and the world family's vision is on London. Why? London receives a very big lift through Dadi's sustenance and you have the blessing of being OK because Baba says that the UK is always OK.

Baba gave a very good method in today's murli for those that live in the family to keep your lokik relations completely content. He said: don't see limited relations, see the soul. As you do this you will feel happiness and mercy. Baba is underlining this: see the other as a soul.

When we were with Baba for 14 years in Karachi we practised this so much that we never went into thoughts of the nature and feelings of others; our vision did not go anywhere else. We would check – am I in a stage of soul consciousness? Baba taught us so well that that strength remains with us to this day. We still ate and drank and moved along but the attitude became so firm. It is still possible to have that degree of soul consciousness; the only difference is that there are additional types of service.

Baba has said that determination is the key to success. He has said to have the link of remembrance again and again and to make it firm. It's not that we make mistakes or have waste thoughts, but we become ordinary. We don't realize nor think that Baba, Karankaravanhar, is doing everything, and that I am the instrument. The link breaks and we forge it again and again and energy goes into that. Then the soul feels that there isn't internal strength. Baba has said that there is a need for constant attention now so forge a constant link and then, even if a little maya comes, the power you have will enable you to keep that connection.

According to your timetable see that you are forging and keeping that link and the intoxication of Baba as Karankaravanhar. Children are watching the time and state of the world and even now the world says that the time has to change; that change has to happen quickly. This family is so big and has to transform.

Dadi Janki – love and remembrances to Delhi, the one with a big heart.

Om shanti.
